This is the year's second listing of out-of-community seedlings ready for individual 1½ or 2-inch pots. Included are some of the REDS and YELLOWS, offered last Winter in community-pot-lots out of flasks. I sold more than anticipated, so now quantities are decidedly limited, and prices relatively high. Not high, though, compared to what they will be if offered later in individual 2-inch pots!

MINIMUM ORDER OF BARE ROOT SEEDLINGS: 10 seedlings (assorted, your choice!)
They fly to you, Air Mail Prepaid!

Numbers 70-R, 72-R, 696, 711, 715, 732, 737 are priced at 50¢ per seedling. Note minimum.

Numbers *488, *491, *704, *705, *708 are priced at \$1.00 per seedling. Note minimum. Your minimum order may include dollar seedlings and fifty cent seedlings, just so you choose ten seedlings (or more) and pay according to price indicated.

#70-R - C. ELEANORE ALBA X C. NUTLEY ALBA - Extra fine White-Colored-Lip cross, expected to bloom twice yearly, Spring and Fall.

#72-R - LC MEMORIA REMY CHOLET X LC PRINCESS MARGARET - Should produce large, dark red-lavenders with glowing crimson-purple lips, twice yearly, Spring and Fall.

*#488 - LC APRICOSA, AM.RHS X LC HENRIETTA P. DANE - This cross of rich apricot and lemon yellow hybrids should turn out some unusually fine flowers with varying shades of yellow, orange and apricot.

*#491 - C. KING GEORGE X LC HENRIETTA P. DANE - Both parents fine Yellows. Red-fuchsia lips.

#696 - BLC IRENE X LC CROWBOROUGH X LC LINNAEUS T. SAVAGE - Bright rose with showy, very ruffled crimson purple lips.

*#704 - C. SUPERBA X POTINARA ETHEL WARD - Should produce very heavy textured, 5 to 6-inch blooms with plenty of RED in the dark purple tones. Spring.

*#705 - SLC RADIANS X LC ILLIONE X LC RUBENS - Fine quality RED hybrid, larger than above and with more of the round form. Winter.

*#708 - LC PLYMOUTH X C. EDMOND DEMUNTER - Plymouth, a Black and Flory hybrid, is a cross of Lc Ruth, var. Gorse X C. King George var. Brilliant. Intense butter yellow with velvety, dark purple lip. Lighter yellow Edmond Demunter (triumphans X Hardyana) had very broad, ruffled rose-purple lip topped with pale gold.

#611 - LC BRITANNIA ALBA X LC PARIZADE ALBA - Fine, Spring blooming White-Colored-Lip hybrids are always in demand for Easter, Mother's Day etc. and both parents here had grand shape and texture; pure White S & P and brilliant lips.

#715 - BLC LANGLADE ALBA X LC PARIZADE ALBA - The Blc parent in this cross should make some of them Fall and Winter blooming. White-Colored-Lip Blc's are less plentiful than Lc's and straight Cattleya crosses.

#732 - LC WESTWOOD X BLC MARION RYERSON - Both large, dark, heavy textured and very showy parents were "Happy New Year" blooms, but the cross may bloom twice yearly. Westwood is always so big, bold and heavy textured that visitors can't refrain from touching the flowers to make sure they are real. This Marion favored Hartland, with that grand brasso's bold round form and reddish plum purple color.

#737 - LC GWEN SANDER X C. TRIANAE VAR EDGAR KNIGHT - Like Mother Nature to paint crimson-purple stripes on petals to match the lip and throat? This is your ticket.

DANIEL RYERSON, Box 805, HOMESTEAD, FLA.
